

MOBILE OPERATIONS KIT

MAINTENANCE AND TESTING
FROM THE FIELD

DIAGNOSE YOUR DEVICES FROM ANYWHERE

The CentrAlert Mobile Operations Kit was created specifically for running maintenance and diagnostics on your devices from the field, with a particular focus on sirens.

The Mobile Ops Kit, which contains a ruggedized C-DAC laptop complete with Guardian User Interface, allows the operator to set up and test any system device from the field without losing any of the core functionality of C-DAC.

Components

- Rugged Case
- CentrAlert C-DAC Ruggedized Laptop
- Single Communication Link (SCL)
- Radio
- Uninterruptible Power Supply (UPS)
- Industrial Power Cord
- Automotive Power Inverter (12VDC)
