GUARDIAN
USER INTERFACE
YOUR PORTAL TO
CRISIS-DRIVEN ALERT & CONTROL

SIMPLE ACTIVATIONS FOR COMPLEX PROCEDURES

The Guardian™ User Interface is your portal to the CentrAlert C-DAC system, allowing you to easily provide integrated crisis alerts and notifications to multiple devices and device types. Our easy-to-use "recipe" creator coordinates all of your Protective, Maintenance or Drill Actions, grouping them according to your emergency action plan. You can select affected areas using our mapping tools and device lists., with icons showing the different devices as they are added to the interface.

Guardian allows you the freedom to pre-stage your recipes prior to activation or dynamically build them on the fly. During activation, Guardian also provides real-time updates via status bars, icon symbols and alert messages. You can connect one or numerous Guardians to coordinate system activity across a wide variety of users from Emergency Managers to System Operators and Maintenance personnel.

Operational Features
- Windows-Based User Interface
- Standardized Activation Screens
- User Configurable Protective, Drill and Maintenance Actions
- Real-Time System Status
- Standalone or Fully Networkable
- Multiple User Levels with Rigorous Identification, Authorization and Access-Control Mechanisms
- Extensive Mapping Capabilities with the Option to Pre-Load or Create Maps on the Fly
- Selectable Device Icons
- Pre-Stage and Live Staging Environments
- Data Storage and Archiving
- Full Reporting Functionality
- Database Import Functions
- Redundant Sub-Systems with Transparent Failover
- Remote Access via Remote Guardian and Mobile Guardian

The CentrAlert® hardware line works seamlessly with our Crisis-Driven Alert & Control™ (C-DAC) software suite, providing both input activation controls and output notification devices. Our hardware products can also integrate third-party components for C-DAC control. Additionally, they can be installed as standalone devices for use where third-party controls are in place. We also manufacture custom devices - call CentrAlert for details.
