MOBILE GUARDIAN

YOUR MOBILE PORTAL TO CRISIS-DRIVEN ALERT & CONTROL

ACCESS YOUR C-DAC FROM ANYWHERE

As part of the Guardian User Interface for the CentrAlert Crisis-Driven Alert & Control (C-DAC) system, you also have the option of including licenses for installation of the Mobile Guardian App. This App enables you to access certain features of the Guardian User Interface from your registered mobile device.

And the most important feature available on the Mobile Guardian App is the ability to activate any of your previously created actions no matter where you are. This means that you are always in control of your C-DAC system no matter when a crisis may strike.

Operational Features
- Run Protective, Drill or Maintenance Actions from Any Mobile Device
- Access Multiple C-DACs from One Device
- Sleek, User-Friendly Interface
- Activations Tracked in Real-Time on Linked Guardian User Interface
- Activation History with Exact Dates and Times
- Upload Logs Directly to CentrAlert Servers
- Secure Connection via Company VPN
- Available for Apple and Android
