

# OIL AND GAS ALERT

STOPPING THE CRISIS  
IN ITS TRACKS

## PROACTIVELY MITIGATING SITUATIONS IN REAL TIME

Part of our suite of Adaptive Intelligent Controls, Oil and Gas Alert allows the CentrAlert C-DAC system to detect oil and gas or other leaks.

Industrial plants, military weapons reserves and even some commercial sites face the possibility of oil and gas leaks that can cause explosions, wasted resources and environmental damage.

With C-DAC, organizations and communities can rest assured such events will not go unnoticed. CentrAlert's software and hardware will recognize an oil or gas leak has occurred and send notifications to those who can put a stop to the leak or shut down facility processes.

### Operational Features

- Receive Input from Fire Detection System
- Initiate Pump Shutdown
- Open or Close Valves
- Release Mitigating Substance in the Event of a Leak
- Control Link via TCP/IP, Hardline, Custom API or Other Means

### Paired Field Devices

- Director I/O-4 Unit
- Contact Closure Unit

### Other CentrAlert Adaptive Intelligent Controls

- Dam Breach Detect
- Lightning Detection
- Access Protect
- Live Alert Protect
- HVAC Safe

3090 Harrodsburg Road, Lexington, KY 40503 | 859.224.1047 | [info@centralert.com](mailto:info@centralert.com) | [centralert.com](http://centralert.com)

The CentrAlert® hardware line works seamlessly with our Crisis-Driven Alert & Control™ (C-DAC) software suite, providing both input activation controls and output notification devices. Our hardware products can also integrate third-party components for C-DAC control. Additionally, they can be installed as standalone devices for use where third-party controls are in place. We also manufacture custom devices - call CentrAlert for details.
