

# REMOTE TERMINAL UNIT

SECURE AND RELIABLE  
COMMUNICATIONS

## COMPATIBLE WITH MULTIPLE SIREN SYSTEMS

The Remote Terminal Unit Siren Controller 3 (RTU-SC3) is a control board designed to function with geographically dispersed sirens and/or other emergency warning devices. The RTU-SC3 board can be used to convert third-party hardware for operations under the CentrAlert C-DAC system protocols. Features include two-way communications, diagnostics for system health checks and CentrAlert's standard 256-bit encryption for complete security.

### Operational Features

- Communication Pathways include Analog Radio, Digital Radio and Ethernet
- On-Board Voice Message Option
- Detects Amplifier Failure
- Sound Detection for Instant Feedback on Live Tests or Activation
- Compatible with Third-Party Siren Systems or Public Address Systems

### Paired Software Component

- SOS Siren Module
